

Application Developer

The Marker Group is a national, industry leader litigation support services located in northwest Houston. Successful candidates will be detail oriented and able to meet deadlines working in a challenging environment seeking innovative solutions for the rapidly growing demands of our clients. We need a developer who is interested in taking a project from start to finish. Marker's offers competitive compensation and great benefits.

Markers has a small IT team and is looking for a versatile developer who wants to work beyond simply user interfaces and data access on proprietary software, and is also able to provide software and end-user support.

Requirements:

- Minimum 5 years of experience in building web solutions using ASP.Net
- Full stack developer will be responsible for the architecture, development, maintenance, security, and support of all customer-facing and internal web applications
- Solid understanding of coding techniques to prevent cross-site scripting and other malicious attacks
- Proficient in the primary technologies supported: **ASP.Net, C#, Ajax, JavaScript, jQuery, CSS, JSON, IIS**
- Strong experience and knowledge of Microsoft SQL Server and SQL database administration (with extensive use of t-SQL, stored procedures, views, and triggers)
- Must have thorough Windows/MS Office knowledge.
- Ability to work with end users and management to develop requirements and communicate progress.
- Ability to work with rapidly changing priorities.
- Service minded, organized and ability to work independently with little supervision.
- Sound judgment and logical decision-making are critical in this position
- Must be able to lift and carry up to 25 pounds.

Work requires occasional weekend and/or evening work and the ability to remain on-call and available to provide management support in event of emergencies

We are an equal employment opportunity employer.
